山东大学 计算机科学与技术 学院

数据库 课程实验报告

实验题目:实验七 综合查询

实验过程:

1. 在学生表 pub. student 中统计名字(姓名的第一位是姓氏, 其余为名字, 不考虑复姓)的使用的频率, 将统计结果放入 test7_01 中。

```
create table test7_01(first_name, frequency) as↓
with temp(first_name, name) as↓
(select substr(NAME, 2, length(NAME)), name from pub.STUDENT)↓
select first_name, count(first_name) frequency from temp↓
group by first name
```

FIRST_NAME	FREQUENCY
▶ 爱生	1
贵库	1
国占	1
海鵬	1
杰清	1
→永文	2
云庆	1
侧帆	1
■ 狗只	1
建峰	7
建花	2
建生	5
江兰	1
□ 俊平	5

2. 在学生表 pub. student 中统计名字(姓名的第一位是姓氏,不作统计,名字 指姓名的第二个之后的汉字)的每个字使用的频率,将统计结果放入 test7 02 中(特别提示:需要区别 union 和 union all 的不同)

```
create table test7_02(letter, frequency) as↓
with temp1(word, name) as↓
(select substr(NAME, 2, 1), name from pub.STUDENT),↓
temp2(word, name) as↓
(select substr(NAME, 3, 1), name from pub.STUDENT)↓
select temp.word, count(temp.word) frequency ↓
from ((select * from temp1) union all (select * from temp2)) temp↓
group by word↓
having count(temp.word) <> 0
```

```
create table test7_02(letter, frequency) as↓
with temp1(word, name) as↓
(select substr(NAME, 2, 1), name from pub.STUDENT),↓
temp2(word, name) as↓
(select substr(NAME, 3, 1), name from pub.STUDENT)↓
select temp.word, count(temp.word) frequency ↓
from ((select * from temp1) union all (select * from temp2)) temp↓
group by word↓
having count(temp.word) <> 0
```

LET	TER	FREQUENCY	
▶ <u>媽</u>			2
广			16
组			125
利			37
			14
一志			112
一冰			5
帆			1
一敬			4
]立			19
强			72
一万			12
玉			105
泽			13

3. 创建"学院班级学分达标情况统计表 1" test7_03, 依据 pub. student, pub. course, pub. student_course 统计形成表中各项数据, 成绩>=60 为及格计入学分,总学分>=10 为达标,院系为空值的数据不统计在下表中,表结构:院系名称 dname、班级 class、学分达标人数 p_count1、学分未达标人数 p_count2、总人数 p_count。

```
1 create table test7 03 as↓
 2 with sc1 as↓
 3 (select sid, cid, max(score) score from pub.STUDENT_COURSE↓
 4 group by sid, cid),↓
 6 (select s.dname, s.class, s.sid, sum(credit) sum_credit from pub.STUDENT s, sc1, pub.COURSE c
 7 where s.sid = sc1.sid↓
 8 and sc1.cid = c.cid\downarrow
 9 and sc1.score >= 60↓
10 and dname is not null↓
11 group by s.dname, s.class, s.sid),↓
12 pcnt1 as \
13 (select dname, class, count(sum_credit) p_count1 from pc1\downarrow where sum_credit >= 10\downarrow
15 group by dname, class),↓
16 pent as I
17 (select dname, class, count(*) p_count from pub.STUDENT↓
18 where pub.STUDENT.DNAME is not null.
19 group by dname, class),↓
20 pcnt2(dname, class, p_count2) as↓
21 (select dname, class, p_count-p_count1 from pcnt natural join pcnt1)↓
22 select * from pcnt1 natural full join pcnt2 natural full join pcnt
1 update test7_03 set p_count1 = 0 where p_count1 is null
```

```
1 update test7_63 set p_count2 = p_count where p_count1=0
```

4. 创建"学院班级学分达标情况统计表 2" test7_04, 依据 pub. student, pub. course, pub. student_course 统计形成表中各项数据, 成绩>=60 为及格计入学分, 2008 级及之前的班级总学分>=8 为达标, 2008 级之后的班级学分>=10 未达标,院系为空值的数据不统计在下表中,表结构:院系名称 dname、班级 class、学分达标人数 p_count1、学分未达标人数 p_count2、总人数 p_count。

```
1 create table test7_04 as↓
 2 with sc1 as↓
 3 (select sid, cid, max(score) score from pub.STUDENT_COURSE↓
 4 group by sid, cid),↓
 5 pc1 as \
 6 (select s.dname, s.class, s.sid, sum(credit) sum_credit from pub.STUDENT s, sc1, pub.COURSE
7 where s.sid = sc1.sid↓
8 and sc1.cid = c.cid↓
9 and sc1.score >= 601
10 and dname is not null↓
11 group by s.dname, s.class, s.sid),↓
12 pcnt10 as↓
13 (select dname, class, count(sum_credit) p_count1 from pc1\downarrow where sum_credit >= 10\downarrow
15 and class > 2008↓
16 group by dname, class),↓
17 pcnt11 as↓
18 (select dname, class, count(sum_credit) p_count1 from pc1\downarrow
19 where sum_credit >= 8↓
20 and class <= 2008↓
21 group by dname, class),↓
22 pcnt1 as↓
23 (select * from (select * from pcnt10) union all (select * from pcnt11)), ↓
24 pcnt as↓
25 (select dname, class, count(*) p_count from pub.STUDENT\downarrow where pub.STUDENT.DNAME is not null\downarrow
27 group by dname, class),↓
28 pcnt2(dname, class, p_count2) as↓
29 (select dname, class, p_count-p_count1 from pcnt natural join pcnt1)\downarrow
30 select * from pcnt1 natural full join pcnt2 natural join pcnt
```

实验结果:

201600301320 张延慈	7 -	1	统计名字使用频率	2019-05-19	按时完成	(NULL)	2019-04-07 14:17:29 2.5 / 2.5
201600301320 张延慈	7 -	2	统计名字的每个字使用频率	2019-05-19	按时完成	(NULL)	2019-04-07 14:51:08 2.5 / 2.5
201600301320 张延慈	7 -	3	学院班级学分达标情况统计表1	2019-05-19	按时完成	(NULL)	2019-04-10 16:03:18 2.5 / 2.5
201600301320 张延慈	7 -	4	学院班级学分达标情况统计表2	2019-05-19	按时完成	(NULL)	2019-04-10 16:28:14 2.5 / 2.5
